Summary

Software Engineer with **3+ years** in **Java** backend and full-stack delivery (**Spring Boot**, **REST APIs**, **React**). Delivered telecom/BSS solutions for global clients (XL Axiata, Vodafone Germany, Optima Philippines) including third-party integrations, **Apache Camel** services (**1M+** daily transactions), **SQL** performance tuning, and **CI/CD** (**Jenkins**). Built internal automation tools for logs, deployments, subscriber lookup, and end-to-end **API** debugging in production.

Experience

AMDOCS DEVELOPMENT CENTER — Software Engineer

07/2023 – Present

XL Axiata — Java developer

Pune, Maharashtra

- Delivered third-party service integrations in Agile squads, improving internal-external system communication and partner onboarding for production telecom traffic.
- Designed and optimized **Camunda** workflows and automated testing frameworks; improved performance test execution speed by **5%**, workflow reliability, automation efficiency, scalability, and monitoring systems.
- Collaborated on **database optimization**, reducing query response time by **10%** and reducing fallouts.
- Supported production incident triage and root-cause debugging for integration and **Camunda** workflow issues, improving release stability on supported telecom modules.

VODAFONE Germany — Software developer

- Developed microservices and application features using **Java**, **Spring Boot**, **React**, and **REST APIs**, resulting in **5%** faster project delivery through smaller releases and automated quality gates.
- Optimized complex **SQL** queries with indexing and query-tuning on reporting paths, cutting report generation time by **>10%**. Improved backend efficiency and resource utilization for high-load windows.
- Automated testing using **TestNG**, raising coverage from **60%** to **90%** ensuring robust test coverage.
- Improved high-load backend reliability through performance monitoring, log analysis, and targeted fixes during peak reporting and subscriber operation windows.

OPTIMA Philippines — Backend developer

- Developed and maintained **Apache Camel** microservices handling **1M+** daily transactions with reliable system integrations, monitoring, logging, scalability, and production-grade stability.
- Built and maintained **Jenkins CI/CD** pipelines for automated build and deployment workflows, reducing manual deployment effort by **60%** and improving release consistency, monitoring, and reliability.
- Built internal automation tools: **Fuse Logger** (multi-env log search), **Subscriber Tool** (DB lookup by MIN/accountId), **SM Tool** (deployment automation), **API Visualizer** (end-to-end API flow mapping).
- Supported production incident triage and root-cause analysis using logs, monitoring, and cross-team debugging for integration and workflow fallouts.

Projects

MS-BUILDER — Microservice Builder

2023 – Present

- Developed a microservice builder that generates **Spring Boot** services from **OpenAPI** specifications.
- Extended the builder to auto-generate **REST** controllers, **Docker** images, deployment configs, and **Jenkins CI/CD** pipelines for end-to-end microservice rollout.

NIT WARANGAL Summer School Project

01/2023 – 06/2023

- Implemented a **STR-DFT** based algorithm using **Python**, **NumPy**, and **pandas** for advanced signal processing and data analysis, improving computational accuracy, scalability, and performance reliability.
- Developed mathematical and predictive models using advanced algorithms and **Python**-based analytical tools, achieving accuracy rates exceeding **95%** across projects consistently.

Skills

Languages: Java, Python, C++, C | **Testing:** JUnit, Mockito, TestNG | **Data:** MySQL, Couchbase, Kafka

Backend: Spring Boot, Apache Camel, REST APIs, Microservices | **Tools:** Git, Maven, Bitbucket

Frontend: React, Angular, HTML, CSS | **DevOps & Cloud:** AWS, Docker, Kubernetes, Jenkins

Certificates / Achievements

- CodinGame Winner Q4'23** at Amdocs — ranked 1st among **10,000+** participants globally.
- Amdocs India Coding Champion; AIR-177** in NIMCET; 4th place in **NITW Hackathon**.
- Certified in **AWS Cloud Practitioner**, **Kubernetes for Beginners**, and **YAML: Zero to Master**.

Education

Master of Computer Applications

National Institute of Technology, Warangal

Warangal, India

10/2020 – 07/2023
